
Dijit Font Catalog

This font catalog shows the standard font set included with a Scitex Dijit Printer. The catalog is in numerical order based on font number. Generating bitmap images of the fonts at the proper resolution produced the character sets in this catalog. Slight variations may exist between the characters shown in this catalog and the actual printed fonts.

Character sizes stated in this catalog were determined using standard calculations for printed type size with adjustments for Scitex ink jet technology. Therefore some character sizes stated are approximate.

Bar codes represented in this font catalog are for sizing purposes only. Due to differences in printing technologies the bar codes may or may not scan when printed from this catalog. For complete information on bar codes scanning grades for each of the bar codes please see document number # 0173634 Printing Bar Codes on 5000 Printer.

Due to variations in substrates and scanner performance Scitex DPI recommends that any OCR or bar code font be thoroughly tested for suitability in any intended application before running production jobs.

The following information is included for each font.

Font Number:	The number assigned to the font for use by the Jetscape software. This is the number you will use to identify the font in the layout screen in the data prep software.
Family Name:	The family of fonts that this particular font belongs to.
Family Type:	The character set included in the font. Selections are either Domestic or International. International fonts include European characters.
Face:	The density of the font characters. The face can be Light, Normal, Medium, Bold, or Extra Bold.
Character (Char.) per Inch	The number of characters per inch in a mono spaced fonts. For proportional spaced fonts this will read Proportional.
Lines per Inch:	The number of lines that can be printed by the Dijit printhead
Line Spacing:	The height of 1 line of print.
Dots above Baseline:	The number of dots from the baseline to the top of the character cell
Dots below Baseline:	The number of dots from the baseline to the bottom of the character cell
Resolutions:	The resolutions available for this font. The 5120 system will print at either 120x120 or 120x240 dpi. The 5240 system will print at 240x240 or 240x480 dpi.
Subfonts:	A font consists of one or more subfonts. Each subfont contains bitmaps for a unique set of characters. Therefore, the number and assortment of characters in a particular font depends on the subfonts included in that font. The subfonts are described in the 5000 printer Font Guide (part number 0113582)
